---

## Summary

I am a Florida Atlantic University graduate, seeking an entry-level software development position with an organization that is forward thinking, where my determination, passion, and skill set will be helpful in achieving and exceeding any defined goals. My skillset is currently quite focused on desktop and terminal application development.

I am comfortable with developing in many different programming languages and environments, and willing to learn how to work with new languages and systems as needed.

## Skills

I am most familiar with development using:

- Python
- Java (and GUI development using Swing)
- C++
- C
- HTML
- CSS

Additionally, I am familiar with:

- C# (and GUI development using Windows Forms)
- Lua
- Javascript
- Bash shell scripting

I am skilled with working on all major desktop operating platforms, Windows, Linux, and macOS and familiar with troubleshooting on each platform.

## Education

Bachelor of General Studies (graduated December 2019)  
Florida Atlantic University, Boca Raton  
College of Engineering and Computer Science
